

**St. Johns Lutheran School Fundraiser
30% Benefits A.P.T. Program
Tomato Plant Sale**

Wild Boar Farms Nursery (www.wildboarfarms.com) fundraising can cultivate students' curiosity in nutrition, gardening, plant biodiversity, organics, our national heritage and the culinary arts. It is a path to benefit schools or organizations and promote healthy living. The program was developed to help schools reach their fundraising goals in a healthy way. It is one that teaches how food is grown and its connection to wellness and eating local.

Grow Your Own

The plants available are all locally grown, and several are locally bred varieties that Wild Boar Farms has created. You will find cherry tomatoes, open-pollinated tomatoes, classic heirloom tomatoes, some hybrid varieties that are available listed below. As well as new Blue Tomatoes!

For pictures and descriptions please visit www.wildboarfarms.com under "Events" and then "Plant Fundraisers"
